PROJECTS

Job Portal System | GitHub *May 2026 – Sep 2026*

Tech Stack: Java, Spring Boot, MySQL, HTML, CSS, JavaScript, React, TailwindCSS, Docker

- Developed a full-stack Job Portal System using Java, Spring Boot, React.js, and MySQL to manage candidate profiles, company job postings, job applications, and resumes.
- Secured 20+ REST APIs across Candidate, Company, and Admin roles using **Spring Security, JWT authentication, and BCrypt password hashing**.
- Implemented OTP-based email verification with **10-minutes expiry**, resume management, and job application workflows using Spring Data JPA, Hibernate, Axios, and global exception handling.

Traveller's Pick | GitHub *Sep 2025 – Jan 2026*

Tech Stack: Java, Spring Boot, MySQL, HTML, CSS, JavaScript, Bootstrap, Docker

- Developed a tour and travel management application with **user and admin workflows** for package browsing, itinerary management, booking, and cancellation management.
- Implemented **session-based authentication and role-based access control (RBAC)** to secure user and admin operations and restrict access to role-specific features.
- Implemented booking and notification workflows with unique **PNR generation** and automated booking confirmation and cancellation emails using **JavaMailSender and Brevo SMTP.**
